### Function

#### Full-color

This full-colour camera adopts a large aperture lens and high performance sensor. With a higher amount of absorbed light and advanced image processing algorithms, the camera provides 24/7 colour monitoring with clear and vivid information, significantly increasing the probability of gathering reliable people, vehicle, and event evidence that can be used for further intelligent analysis.

#### Broadcast-quality Audio

Audio information is used as supplementary evidence in video surveillance applications. This HDCVI camera supports audio signal transmission over a coaxial cable. In addition, it adopts unique audio processing and transmission technology that best restores source audio and eliminates noise, guaranteeing quality and effectiveness of collected audio information.

#### Warm Supplemental lights

With warm supplemental LED lights, the camera is able to provide a colourful and vivid image even in total darkness. By default, the camera is set to smart light mode, in which the camera can automatically adjust the exposure time and light sensitivity simultaneously to avoid overexposure of the objects in the image center.

#### 4 Signals over 1 Coaxial Cable

HDCVI technology supports 4 signals over 1 coaxial cable simultaneously, i.e. video, audio, data and power. Dual-way data transmission allows the HDCVI camera to interact with the XVR, by sending control signals or triggering alarms. Moreover, HDCVI technology supports PoC for construction flexibility.

#### Long Distance Transmission

HDCVI technology guarantees real-time transmission at long distances without any loss. It supports up to 700m transmission for 2MP/5MP/8MP HD video via coaxial cable, and up to 300m via UTP cables.

#### Protection (IP67, wide voltage)

**IP67:** The camera passes a series of strict tests on dust and soaking. It has dust-proof functionality, and the enclosure works as normal after soaking in 1m deep water for 30 minutes.

**Wide voltage:** The camera allows  $\pm 30\%$  (for some power supplies) input voltage tolerance (wide voltage range), and it is widely applied to outdoor environments with unstable voltage.
